BILATERAL MEETINGS

Friday (02:00 pm - 07.00 pm) Please add the cooperation profile

Saturday (10:00 am - 01:00 pm) Please add the cooperation profile

DESCRIPTION THE KENPONG GROUP The Kenpong Group (Kenpong) is a dynamic and diversified Group in Ghana that offers solutions in construction, travel & tours and mobile communication industries. Kenpong has a history of excellence that started in the construction industry by providing solutions in various areas of the Ghana Economy. Building on this platform of uncompromising service levels Kenpong spread its wings to clone “The Kenpong Way” business philosophy into other industries with the knowledge that it will soon become the leader in those carefully selected areas of business. Kenpong water works Kenpong Construction’s execution of water projects, including water wells are important in providing quality water and protecting the environment. Most families rely on natural water services for their everyday use hence; we construct good wells whilst maintaining it to provide clean water. Most Water works services like modern wells must be well drilled; it also requires a fairly complicated and expensive drill rig, this is why Kenpong Construction uses the best technologies to provide safe water whilst protecting the environment. Environmental protection of the land during and after drilling is Kenpong Construction key policy. Drilling permit requirements inhibit ground water contamination and require proper disposal of sand and prevent highly saline

(salty) and other wastes in water. In this regard Kenpong Construction is also involved in construction of Cocoa storage facilities at Cocoa producing areas in Ghana. The company is looking to expand in this area and also help the farmers in reducing post-harvest losses especially during the bumper season. Kenpong Food tourism Kenpong Travel and Tour uses Food tourism in the exploration of food as the purpose of tourism. Clients that travel from around the world to Ghana are sent to different areas to enjoy the foods. After a memorable eating, cocoa beverages are served for good drinking experience. Hygiene standards and health considerations and knowledge of tourists concerning the local foods are discussed. Our tourism staffs are well versed in biodiversity and the attractions created by a rich and varied environment. They educate locals of causes of loss of biodiversity when land and resources are strained by excessive use, and when impacts on vegetation, wildlife, mountain, marine and coastal environments and water resources exceed the carrying capacity. This loss of biodiversity in fact means loss of tourism potential hence; education is always given out to the locals at varying areas for environmental protection in their water, food and animal hunt. Kenpong Construction Services • Construction of cocoa sheds • Construction of water wells • Construction of roads to cocoa producing areas • Hand-hole and manhole construction. • Laying of HDPE PVC's • Pole planting • Trenching • Water works

ORGANIZATION TYPE Big Company / corporation, Clusters,

AREAS OF ACTIVITIES AGRO-FOOD MANUFACTURING, FOOD SECURITY, SAFETY AND QUALITY CONTROL, FOOD TRACEABILITY, FOOD CONSERVATION AND SHELF LIFE

WATER TECHNOLOGIES, SPACE APPLICATION TO AGRICULTURE, ENVIRONMENTAL MANAGEMENT
