Water technologies, space application to agriculture, environmental management

Energy production, renewable energies

Technological Offer

Urban waste treatment & Alternative Energy

Platinum Tenerife is a technological innovation center. Its R & D department has an important up to date knowledge base , thanks to the important links and collaborations with national and international researchers, universities and recognized research institutions.

A group of professionals with over 30 years of experience make it possible to search, develop and implement technological solutions.

Our company offers different advanced patented technologies.

First of al we treat and revalue urban, hazardous and hospital waste by plasma torch technology.

We are specialized as well in watertreatment (sewage, potable, brackish, seawater, etc.), using electrochemical technology.

Furthermore we build our own renewable and alternative energy plants.
