### Description

ATT INOX is the leading manufacturer of stainless steel products in Europe.

We are an organization with 120 people and spread distribution around the world.

### Main products:

- internal drainage systems (floor drains and channels) for food & beverage industry, hotels, kitchens, restaurants,
- stainless steel pipes & fittings for chemical & pharmaceutical industry,
- SPA decorative channels for domestic application,
- gratings, podiums & platforms for industrial (like Oil & Gas) application,
- protection elements (bollards, balustrades, fences, curbs),

Please visit our website [www.att.eu](http://www.att.eu) to find out more.

### Organization Type

SMEs

### Areas of Activities

**Water technologies, space application to agriculture, environmental management**

### Business Offer

## STAINLESS STEEL SHOWER CHANNELS

We offer modern solutions in terms of bathroom drainage systems, thanks to which every bathroom obtains not only more space, but

also becomes stylish and elegant. Our shower channels are comfortable in every-day use, ensuring safety and long term durability. Bathroom channels are the excellent alternative versus traditional shower basins. They let their users gain extra space

in the bathroom; therefore, they can be applied in every bathroom, even the tiniest one. We provide professional service and technical support in order to enable you to choose the solution perfectly matching your needs. We can also adjust our products to individual customer's expectations, modifying the dimensions and the finishing of the grating and even create a new product based on the customer's design.

## **STAINLESS STEEL PIPES & FITTINGS**

Pipes and fittings of stainless steel for drainage systems under gravity or vacuum. By industries, hospitals, shipbuilding, big kitchens for

communities, drainage waters are charged with several substances

which are often corrosive. In certain concentrations and temperatures these chemicals may damage - chemically, mechanically or per electrolysis - the materials they come in touch with.

Therefore the piping systems that evacuate such waters must

be made of suitable materials to reasonably withstand the corrosive agents. To comply with this need we propose a programme of drainage piping of stainless steel AISI 304 and AISI 316.

**DIAMETERS:**

- DN 40,
- DN 50,
- DN 70,
- DN 80,
- DN 100,
- DN 125,
- DN 150,
- DN 200,

**Working Pressure 5 bar - Vacuum -0,96 bar**

**MAIN APPLICATION:**

- Gravity and vacuum grey and black water piping systems,
- Sewage systems,
- Drainage and scuppers systems,
- Air vent systems

**AVAILABLE FITTINGS:**

- elbows,
- branches,
- couplings,
- reducers,

**Business Offer****STAINLESS STEEL CHANNELS**

Channels are used to drain water from the floor and discharge it to the sewerage. They find wide application in food & beverage processing plants (breweries, slaughterhouses), chemical plants, restaurants, hospitals etc. Channel sizes (width, length, depth, slope) and features (numbers of outlets, types of gratings) are customized according to a particular project. We provide technical support from early stage of design, through manufacturing, until the product installation.

Product data sheets are all available on our website.

## **STAINLESS STEEL FLOOR DRAINS**

We provide wide range of floor drains.

### **TOP SIZES:**

- square from 150x150 mm up to 400x400 mm,
- round from D160 mm up to D300 mm,

### **CONFIGURATION:**

- single part,
- adjustable top,

### **ACCESSORIES:**

- water trap, filter basket, sediment bucket, strainer,

### **OUTLET:**

- directions: vertical and horizontal,
- diameter sizes: D50, D75, D110, D160, D200 mm,

### **GRATINGS:**

- depending on the load class and water intake capacity:  
perforated, bar, mesh, plate,

### **MATERIAL:**

- AISI 304, AISI 316L, AISI 316Ti,
- other grades on inquiry,

### **GENERAL:**

All elements are fully hygienic, tight welded, passivated and pickled, what gives an additional anti-corrossion protection.
