Description

Scandinavian-African Foundation for Growth (SAFG) is an initiative founded to stimulate and promote sustainable development in Africa from Sweden, Denmark, Norway and Finland. Because Scandinavian countries are among countries in the world with a vision to promote growth and development in developing and emerging economies, African countries will gain from the economic vision and development practises in the Scandinavian countries. As a Swedish organization, SAFG works to enhance an international understanding between Africa and Scandinavian countries in areas of development and investment that brings mutual benefit to the two regions. Establishing a genuine growth policy that results in sustainable development in the African continent and at the same time benefiting and enduring continuous investment of Scandinavian countries in Africa creates space for millions of people to come out of poverty
