- Friday (02:00 pm - 07.00 pm) Please add the cooperation profile

Description

Faresin Building S.p.A. is a leading industrial group in the industrialized production of formwork systems for the building industry. The group was founded in 1987 by Mr. Guido Faresin, with a clear mission: to develop and produce equipment for residential, industrial, commercial and civil building and infrastructure requirements, technically innovative, able to reduce time and costs, improving efficiency and productivity. Our systems are manufactured with high quality materials through computerized process and fully automatized product lines: a modern and advanced high-tech Research & Development Department is constantly projecting new and more efficient technologies and various solutions, in line with the most evolved needs in terms of both performance and safety. The product range consists of: wall, circular and pillar formwork systems; lift shafts; single-sided wall; slab systems; Biogas formwork systems, climbing and scaffolding systems and props.
