ABOUT PDI VIANA

Viana Industrial Development Zone (PDI Viana) is an area dedicated for implementation of industrial and diverse business projects, in Luanda, create by the Standing Committee of the Council of Ministers of the Republic of Angola, in 1998 March Resolution nº 4/98, within the Angola Industrialization Plan of the Ministry of Industry. The lines of this plan were adopted in the Government's Economic and Social Policy Program, and involved a number of diverse measure to relaunch the industrial activity in Angola.

More than 500 companies are installed here, Among them, over 150 operate in manufacturing, while others are in different fields such as commerce, services, business parks, etc.

OUR MISSION

» Promote the implementation of industrial projects.

» Analyze the investment proposals and decide on their eligibility for the Zone.

» Ensure contacts and actions necessary to obtain ownership of the land and its use.

"Cooperate with the competent bodies and authorities the rehabilitation and/or construction of necessary infrastructures

» Building and equipping the zone and ensure the necessary funding for investment projects

» Coordinate with other institutions the granting by the Government of the incentives to companies that want to install in the zone

» Ensure the maintenance and proper operation of the facilities

» Manage efficiently and effectively the zone's activity and establish a close relationship with the industrial companies, ensuring the availability of all services, as well as coordination with provincial and municipal authorities.

RELATIONSHIP WITH COMPANIES AND INVESTORS

As part of our corporate responsibility, we offer companies full support. We give special attention to those investors who seek integration at the zone.

INTEGRATION PROCESS

Companies wishing to implement projects at the zone must submit the following:

- Detailed description of the project to be implemented in the zone. Explaining the land extension (Ha or M2) in which the project can be viably implemented.
- Feasibility Study: must inform about the planned capacity of production, water and electricity needs, number of jobs to be created, and other relevant information about the project.
